

Vanish™ will immediately remove chlorine that is present in city water supplies. Chlorine is toxic to fish. Left untreated chlorine can cause gill damage and leave fish unable to breath.

Vanish™ is safe for use with fish, plants, birds or domestic animals that drink from the pond.

Application Rates

1/2 oz / 14 g	Treats up to 1,500 Gallons
1 oz / 28 g	Treats up to 3,000 Gallons
2 oz / 57 g	Treats up to 6,000 Gallons

POND SIZE CALCULATION:

$L \times W \times \text{Avg. Depth} \times 7.5 = \text{Gallons}$

New Pond Application Rate: Apply Vanish™ at the rate prescribed after new pond has been filled. After 20 minutes pond water will be safe for fish and plants to be added.

Established Pond Application Rate: Apply Vanish™ at the rate prescribed when performing a water change or refilling evaporated water.

For Best Results: When adding Vanish™ during a water change it is safest to fill buckets of tap water and apply the correct application for the number of gallons the bucket holds. Stir water in the bucket and dump treated water into the pond. Apply

Vanish™ to an area of the pond with the most circulation to ensure the product will be dispersed throughout the entire pond.

Product Notices: Vanish™ only removes chlorine. Do not attempt to use Vanish™ as a fish medication.

Failure to use as directed, or sudden changes in water conditions not consistent with label, may result in loss or injury to aquatic life. CrystalClear®, Inc. is not responsible for any loss of aquatic life.
